Healing Light Center Church, Sierra Madre CA (approx. 22 courses over 5+ years)
Many Others
(copies of certificates and related documents on request)

I was a private and public educator in Ohio and elsewhere for close to 20 years until a car accident took me out of my career. At the time of the accident, I was a special education supervisor. I had four and a half years of different types of rehabilitation from various kinds of therapists for strength, balance, eye-brain coordination, pelvic floor, and more after the accident in 1991. Energy work was what made me more functional on a more integrated level.

Animals are a huge love and I'm comfortable helping them, also. Have had special training for work with horses as well as having trained and shown them when younger.
